

Ishwarya Chengalvarayan

Senior DevOps & Cloud Security Engineer | Cloud Architecture

ishwaryalakshmi.c@gmail.com · +91 900 348 5601 · Bengaluru, India — open to Global Opportunities, EMEA relocation

[Portfolio](#) · [Live Demos](#) · [GitHub](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior DevOps and Cloud Security Engineer with 7+ years designing, automating, and securing enterprise-scale AWS infrastructure. Deep hands-on background in Kubernetes at scale (1,000+ EKS clusters), Zero Trust architecture, IAM and SCIM lifecycle automation, ZTNA platform evaluation, and security-integrated CI/CD across regulated multi-cloud environments. Track record of authoring platform RFCs, leading greenfield infrastructure builds, and driving measurable reliability, cost, and deployment efficiency improvements. Experienced in operating across FedRAMP, PCI-DSS, and regional data governance requirements across US Gov, China, and EMEA regions.

CORE COMPETENCIES

- Cloud Infrastructure & Security Architecture | Multi-Region AWS (China, US Gov, EMEA) | AWS Well-Architected Framework
- Kubernetes at Scale (EKS, AKS, OpenShift) | EKS cluster hardening | Istio service mesh | Helm | ArgoCD GitOps
- IaC & Platform Engineering | Terraform | Terragrunt | Spacelift | Monorepo architecture | Blessed module frameworks
- Zero Trust & Identity | ZTNA (Cloudflare, Netskope, Palo Alto) | IAM | RBAC | SCIM | SSO/SAML | OIDC | OAuth2 | Okta | Azure AD
- DevSecOps | SAST/DAST (SonarQube, CodeQL) | Policy-as-Code | CIS Benchmarks | GuardDuty | AWS Config | Inspector
- Observability | Datadog Watchdog | Dynatrace Davis AI | Prometheus | Grafana | ELK | CloudWatch | AppDynamics
- CI/CD & GitOps | GitHub Actions | Jenkins | ArgoCD | Spinnaker | Automated pipeline security scanning
- FinOps | AWS Cost Explorer | CloudHealth | Spot.io | Well-Architected cost pillar analysis
- Languages & Scripting | Python | Bash/Shell | PowerShell | YAML | Groovy
- RFC & Architecture Design Document Authorship | Cross-functional stakeholder alignment | Async technical leadership

PROFESSIONAL EXPERIENCE

DevOps Engineer · Bugcrowd

· April 2026 – Present · Remote

- Scoping Monorepo architecture across 100+ repositories in a security-focused bug bounty platform; defining service boilerplate standards and standardising developer onboarding tooling to reduce new-service setup friction.
- Establishing IaC guardrails and CI/CD pipeline standards across a security-sensitive codebase with compliance and auditability requirements.

Infrastructure Architect (Contract) · Mercor AI Lab

· 2026 · Remote — US / Australia

- Greenfield cloud platform architecture for a distributed AI lab deploying LLM inference workloads: authored the platform RFC and architecture design documents covering approach rationale, risk analysis, and phased rollout strategy.
- Implemented a tiered Terraform blessed modules library (S3, IAM, ECS, Lambda, EventBridge) designed for LLM workload deployments, with a Spacelift-driven ClickOps-free pipeline enforcing audit trails across all Monorepo projects.
- Led async architecture design reviews with US and Australian engineering leads, translating infrastructure trade-offs into business-level recommendations across time zones.

Career Break — Southeast Asia

· August 2025 – February 2026

Planned sabbatical following 7 years of continuous employment. Travelled solo across Southeast Asia; trained in Mixed Martial Arts (MMA).

Software Engineer — Cloud Infrastructure & Security · Cisco Systems

· September 2023 – July 2025 · Bengaluru

- Designed secure, scalable cloud architecture supporting 2M+ monthly transactions; improved deployment efficiency by 30% through policy enforcement guardrails and RBAC-aligned access models.
- Managed multi-region AWS infrastructure with Terraform across commercial, China, and US Gov regions — coordinating FedRAMP and regional data governance alignment across security, compliance, and engineering stakeholders.
- Led ZTNA SaaS vendor evaluation (Cloudflare Zero Trust, Netskope, Palo Alto) against identity integration, policy enforcement, and SCIM requirements; authored structured technical comparison for senior engineering leadership.
- Implemented SAST and DAST pipelines (SonarQube, CodeQL) across 50+ Java, Go, and Python repositories, embedding automated vulnerability scanning into CI/CD and reducing dependency exposure.
- Delivered 20% compute cost reduction via AWS Well-Architected cost pillar analysis; led AppDynamics-to-Datadog migration, reducing monitoring overhead by ~40%.
- Integrated Datadog Watchdog and Dynatrace Davis AI for production anomaly detection and executive-grade audit reporting across a 1,000+ EKS cluster environment.

- Operated AWS-on-OpenStack hybrid cloud orchestration for 100+ data centre infrastructure migrations — built automation flows replacing manual provisioning across classified and regulated network segments.

Senior DevOps Engineer · Reshamandi

· May 2023 – July 2023 · Bengaluru

- Led EKS-to-AKS cloud migration and Jenkins-to-Kubernetes pipeline transition; reduced deployment cycles by 30% through Terraform IaC automation.

Senior DevOps Engineer · Gale Partners

· May 2022 – April 2023 · Bengaluru

- Engineered ArgoCD-based GitOps infrastructure across 3 AWS regions with RBAC guardrails, Karpenter autoscaling, and self-serve CI/CD pipelines (GitHub Actions + Spinnaker), reducing manual deployment errors by 80%.
- Led zero-downtime OpenShift 3→4 enterprise migration; conducted solution alignment sessions with platform teams to map current-state requirements before re-architecture. Reduced service downtime by 25% through Istio service mesh redesign.
- Terraform multi-tenant restructuring: 20 customer environments co-located in a single repository — conducted technical discovery, authored the RFC, led implementation into fully isolated per-customer state with zero cross-client blast radius.
- Managed data-intensive pipeline infrastructure: Kafka on Kubernetes for event streaming, Glue jobs feeding Snowflake and Redshift, Fivetran connector management — serving analytics workloads across multiple client environments.

Senior DevOps Engineer · Qburst Technologies · July 2021 – May 2022 · Chennai

- Built AWS infrastructure from scratch for iOS, Android, and web products (Cognito, API Gateway, Lambda, CloudFront, Route 53, CloudFormation); implemented CI/CD via Jenkins and GitHub Actions, improving delivery latency by 40%.
- Secured and managed multi-region AKS environments serving multiple teams: APIM, Ingress controllers, Application Gateway Ingress, Cosmos DB, Event Grid, Function App, Storage Accounts — with shared cluster isolation across regions.
- Multi-region Kubernetes workload management: 50% scalability improvement, 30% downtime reduction via VPC segmentation and IAM access controls.

Systems Engineer · Sify Technologies · July 2018 – July 2021 · Chennai

- Supported 200 Linux enterprise clients across VMware, AWS, and Azure; automated operations with Python, Shell, and Ansible to achieve 99.9% uptime and 35% reliability improvement.
- Led on-premises to AWS cloud migration, reducing provisioning time by 60%; integrated Azure AD and Google Identity for enterprise authentication flows.

PUBLIC PORTFOLIO PROJECTS

AWS Infrastructure & Cost Intelligence Copilot

Natural language interface over live AWS infrastructure data — built on Bedrock, pgvector retrieval, and real collected findings. Enables platform teams to query cost anomalies, account risk, and GuardDuty findings in plain English. [Portfolio](#) · [Live Demo](#) · [GitHub](#)

Identity & Access Decision Studio

Real-time IAM policy evaluation engine integrated with live Okta SSO surfaces identity posture, device posture, and blast-radius analysis before a policy change is rolled out. [Portfolio](#) · [Live Demo](#) · [GitHub](#)

Cloud Security Alert Intelligence

8-flow n8n automation system: multi-source alert ingestion (Wiz, CrowdStrike, Datadog), LLM triage, MITRE ATT&CK and CVE enrichment, and automated remediation generation. End-to-end AI-powered SecOps pipeline. [GitHub](#)

SE Discovery & Solution Design Copilot

Adaptive technical discovery engine that surfaces root-cause gaps, scores them against compliance frameworks, and generates architecture tradeoff options — built as a live platform engineering tool. [Portfolio](#) · [Live Demo](#) · [GitHub](#)

EDUCATION

Bachelor of Technology, Information Technology · Anna University, Chennai · 2014 – 2018 · GPA 8.47 / 10.0
